

## BETA February 2011

Emvelo Products' stand at BETA 2011 was in a great location, right next to the demonstration area. There was a great view of Martin Clunes and Monty Roberts when they did their demonstration and chat. There was also a steady stream of people visiting the stand to find out more about the products and how to become a retailer.

Emvelo unveiled their new 'Ready To Use' range. This has been developed directly as result of customer feedback. Stable+ 'Ready to use' is ideal for using in a horse box or for just a small area. Pet Habitat+ is ideal for using in Rabbit and Guinea Pig hutches.
