

Reduce your use  
of chemicals and  
switch to the  
natural approach  
to Equine Care

*Ezemvelo is a Zulu word for  
the 'natural state' encompassing  
everything that is good about nature;  
abundance, growth, beauty,  
balance, health, energy and serenity.*

**Stable+** is a spray which is applied to Stables, surroundings and bedding. Stable+ applied to the bedding and surrounds can help suppress any harmful microorganisms that could cause diseases and the manure will dry quicker making it less odorous. We also recommend applying to your horse transport system by creating familiar odours to the day to day living areas.

**Protect+** is a spray which is applied directly to affected parts of your horse, taking care not to spray directly into eyes. The aromatherapy oils and their associated odours create an environment that does not appeal to flies, fleas, ticks, midges etc. The product can also be applied to horse rugs and halters.

**Breathe+** is a water-soluble respiratory spray comprising a blend of natural essential oils which provides symptomatic relief for breathing difficulties. Emvelo Breathe+ helps to liquefy thick sticky mucous and open up breathing passages.

## Benefits

Emvelo products work together to demonstrate;

- Natural suppression of the growth of harmful micro-organisms in your horses' surrounds by balancing the bacteria in the environment.
- A more pleasant stable and transport environment for your horse with lower ammonia levels and sweeter smelling.
- Freedom from chemicals and pesticides can often make horses happier and far more responsive.
- Deter annoying flies without the use of chemicals and pesticides.
- Lab test shows the products assist in control of disease such as E.Coli, Salmonella and Campylobacter.
- The manure is less offensive and can be composted directly.
- Compost quality is excellent because it contains live beneficial micro-organisms to re-inoculate the soil and ferment organic material.
- No harmful side effects or withdrawal.

## Healthy Horses Love Emvelo

Horses are highly attuned to nature and they love perfect balance. Horses' respiratory systems are extremely sensitive and by using our products we can help you to provide a healthy comfortable environment for your horses to inhabit, thereby reducing factors that can cause stress. Emvelo's range of products help empower you to allow your horses to freely develop their full physical potential in a natural balanced environment whilst reducing the need for chemicals, pesticides and drugs.
