Pet Habitat⁺ is a spray which is applied to hutches, kennels, aviaries including surroundings and bedding,

helping to suppress any harmful microorganisms that could cause diseases. We also recommend applying each time after you clean out your animal habitat or reapply when adding new bedding. Product can be applied to carpets or areas where animals bring in unwanted guests to reduce possibility of infection and infestation. Recommend regular application.

Pet Protect⁺ is a topical spray which is applied directly to affected parts of your animals taking care not to spray directly

into eyes. The aromatherapy oils and their associated odours create an environment that does not appeal to flies, fleas, tics, midges etc. The product can also be applied to animal toys, rugs, coats and leads.

Pet Breathe⁺ is a water-soluble respiratory spray comprising blend of the natural essential oils which

provides symptomatic relief for breathing difficulties. Emvelo Pet Breathe⁺ helps to liquefy thick sticky mucous and open up breathing passages.

Benefits

Emvelo products work together to demonstrate:

- Assists in natural suppression of the growth of harmful microorganisms in the pets' surrounds by balancing the bacteria in the environment.
- Deter annoying flies and insects without the use of chemicals and pesticides.
- Lab tests have shown the products can assist in control of disease such as E.Coli, Salmonella and Campylobacter.
- Users of the products advise calmer, happy and more naturally behaving animals.
- Reduction in smells.
- For your hutch dwelling animals their manure is less offensive.
- No harmful side effects or withdrawal.
- Safe around children.

Healthy pets thrive within an Emvelo environment

Your animals know where to pick things in the garden or their environment when not well. Like their larger cousins, domesticated animals are attuned to nature and their environment, they love perfect balance. Use the Emvelo range of products to empower your pets to freely develop their potential in a naturally balanced environment reducing the need for drugs. Whether its odour control, annoyance from biting insects or relief from a few sniffles - Emvelo is what you need.
